

# Environmental Consulting Internship (Gardena, CA)

---

## ROUX ASSOCIATES, INC

[www.rouxinc.com](http://www.rouxinc.com)

[careers@rouxinc.com](mailto:careers@rouxinc.com)

Roux Associates is hiring a paid intern for our Gardena Office, located at the intersection of the 405 and 110 Freeways in Los Angeles. The intern position is for no less than 3-months and is for students who are still in school, working towards a geology, engineering and/or environmental sciences degree, or have recently graduated.

The position will involve a commitment of between two and six hours per day for at least two days per week. The work will be predominantly in our office and the work-schedule is relatively flexible. The position will include a wide range of activities in the environmental consulting business.

Key skills that will be important are:

- General scientific/engineering skills;
- The ability to understand 3-dimensional problems;
- Strong Microsoft Word and Excel proficiency;
- A solid work-ethic;
- The ability to multi-task and self-prioritize; and,
- An interest in learning all aspects of the business of consulting.

Please indicate whether you have interest and your availability by replying to: [careers@rouxinc.com](mailto:careers@rouxinc.com), with the exact text: LA Intern Position in the Subject line and please include your resume and a description of your general work-availability in terms of hours per week and days you may be able to work.

Additional information regarding Roux Associates follows:

Roux Associates is a privately held environmental management and consulting firm headquartered in Islandia, New York on Long Island with offices in Boston, Philadelphia, Chicago, San Francisco and Los Angeles. Since 1981, Roux has been recognized for being a highly effective, client focused firm which consults for some of the largest and most sophisticated global industrial corporations, real estate developers and law firms. Roux's services include environmental site assessment, remediation and compliance, litigation and insurance technical support as well as a renowned wetlands practice.

We are retained to help solve our clients most difficult and challenging environmental problems including complex environmental, health and safety problems associated with air, water, land and interior pollution; hazardous materials; and toxic waste treatment and disposal. Roux has built an excellent reputation by understanding our client's needs and providing them with responsive project management and focused technical expertise.

Our best product is the smart and creative thinking that we provide to our clients every day. We continually challenge our professionals with new opportunities in a supportive, healthy, sustainable and safe environment. We are constantly seeking talented and motivated engineers, scientists and support personnel with backgrounds in environmental engineering, earth sciences as well as civil and chemical engineering.
